WIRELESS. SOLVED.

NEXT-GEN CELLULAR DAS FOR MODERN WORKPLACES

A GENWAVE INFRASTRUCTURE SOLUTION

THE CHALLENGE

As employees return to offices, campuses, and industrial sites, seamless cellular coverage is no longer a luxury—it's a necessity. With more mobile-first applications, cloud tools, and 5G-enabled workflows, poor indoor reception means lost productivity, frustrated users, and even safety risks. Most buildings were never designed with cellular in mind, and carriers aren't always willing—or able—to solve these issues alone.

THE SOLUTION

Genwave Technologies is a trusted turnkey provider of in-building cellular coverage systems across Canada. We offer:

- **Multi-Carrier DAS Design & Deployment –** Scalable coverage for any size and complexity.
- **5G-Ready Systems –** Built to support today's devices and tomorrow's demands.
- **Full Carrier Coordination –** We engage directly with carriers, so you don't have to.
- **Safety-First Engineering –** Reliable coverage in stairwells, basements, and critical areas.
- **Ongoing Support –** Through GenCare™ Managed Services or NaaS-style delivery.

THE BENEFITS

- **Always-On Coverage –** No more dropped calls or offline tablets.
- **Workplace Safety –** Ensure emergency services and lone worker tools function everywhere.
- **5G Enablement** – Unlock high-bandwidth applications, video, AR/VR, and mobile collaboration.
- **Future-Proof Infrastructure –** Designed for long life and technology evolution.
- **Flexible Investment Models –** Capex or service-based (NaaS) to suit any budget.
- **Managed Services & Support Program –** For confident ongoing operation and benefits.

AT A GLANCE

CHALLENGES

- Dead zones in office towers, hospitals, factories, and campuses
- Poor reception for 5G-enabled tools and collaboration apps
- Personnel safety concerns in low-signal areas
- Need to support multiple carriers for BYOD workplaces.

CONCLUSION

Genwave's Cellular DAS solutions bring reliable, high-speed mobile coverage into every corner of your facility.

Whether you're enabling a modern workforce, keeping people safe, or powering the next wave of digital tools, we build coverage that works—where it counts.
